Education

School of Engineering, Pokhara University, Pokhara

2021 – 2025

Bachelor of Software Engineering

Skills

Languages: JavaScript (ES6+), HTML, CSS

Frameworks & Libraries: React.js, Node.js, Express.js

Databases: MongoDB

Developer Tools: Git and GitHub, Postman, VS Code

Other Skills: RESTful API Design, Full-Stack Development, Responsive Web Design, Problem Solving, Team Collaboration

Experience

Full-Stack Developer | RaktaSetu Project

- Developed a comprehensive web application connecting blood donors with recipients, streamlining emergency blood donation requests and saving critical time in medical emergencies.
- Implemented secure user authentication and authorization using JWT tokens, ensuring data privacy and controlled access for over 100+ registered users.
- Designed and integrated RESTful APIs for donor registration, blood request management, and real-time notifications, achieving stable uptime during testing phase.
- Created responsive user interface with React components, improving user experience across devices with faster load times.

Projects

RaktaSetu: Smart Blood Donation Solution | React, Node.js, MongoDB

- Built a full-stack MERN application to connect blood donors and recipients with real-time emergency request management.
- Implemented secure JWT-based authentication, RESTful API architecture, and optimized MongoDB queries for improved performance.
- Designed fully responsive UI with React.js ensuring seamless experience across all device types.

Certifications

Google Digital Marketing

Languages

English: Fluent | Nepali: Native | Hindi: Conversational
